

QUALITY

Since the beginning, we wanted to deliver products that not only serve their appropriate purpose, but reflect our high standards of customer satisfaction through Quality.

Quality Management is an integral part of our company culture. It enables us to maintain high-standard for our products and more importantly, provides assurance to our customer that their ordered products are delivered free of any defect & on time.

Together, we can create products and utilize them in a way that enables us to impact the world in a practical manner.

WE PROVIDE ALL TYPES OF
PLASTIC PRODUCTS.

ABOUT US

Based in Southern California, Poly Extrusions Inc. has lead the industry in custom plastic extrusions. We seek to provide products that satisfy the needs of our customers and help us build mutualistic partnerships.

From design to production, Poly Extrusions possess the technological machinery and intellectual capability to do it all. We serve our products to various industries, that range from Commercial to Medical plastic extrusion. We also have custom color matching in all materials for plastic extrusions.

In addition, we practice a system that enables us to perform most off-line secondary operations during the actual plastic extrusion process. Spiraling, Tube-splitting, Punching, and Cutting to length are just a few of the plastic extrusions services we offer.
